(GAs) Are A Stochastic Global Search Method That Emulates The Process Of Natural Evolution. This paper presents a new PID tuning method based on genetic algorithm (GA) for the speed control of a PMDC motor. The PID parameters are optimized using the genetic algorithm. The proposed method is compared with the conventional PID tuning methods. The results show that the proposed method is more effective than the conventional methods. Section 4 presents a simulation of the system with GPID controller. Finally, a conclusion of the proposed GPID technique is presented in section 5.
