[1][2] Historically, protozoans were regarded as "one-celled animals", because they often possess animal-like behaviours, such as motility and predation, and lack a cell wall, as found in plants and many algae. [3][4] Although the traditional Jan 3th, 2024 What are two characteristics of phylum protozoa the mode of nutrition of protozoa is heterotrophic, and most species obtain food by phagocytosis. Phagocytosis is the process where the cell changes shape by sending out pseudopodia to make contact with food particles. Protozoa take food into the cell at a point called the cytostome. ...
