1. Observe and find a pattern - Refraction of light rays in ... The "index of refraction" is an intrinsic property of the medium. The index of refraction of air is 1.0, water is about 1.33, and glass is about 1.5. Incident medium refractive index n_1 , transmitted medium refractive index n_2 . Speed of light index of refraction calculator. ... The only substance listed in Table 1, which has a refractive index greater than zircon is the diamond. We will see more ahead that the great refractive index of the diamond is due to its high refractive index. Rubidium is a soft, silvery metal.

Reflection and refraction of light. If the diamond or the cubic zirconia is immersed in a high index of refraction liquid, then the total internal reflection is thwarted and the diamond loses its "sparkle". For an exact match of index of refraction between cubic zirconia and corn syrup, the cubic zirconia stone would be invisible.

There is a lot of books, user manuals, or guidebooks that are related to light refraction. Packet answer key PDF in the link below:
