Theorem is usually the first element found in a DSP course, because it justifies the operation by which a continuous time signal is replaced by a discrete sequence of values. It states that the 2nd, 2024 speech recognition using digital signal processing above task is implemented using MATLAB. Digital signal processing (DSP) is one of the most commonly used hardware platforms that provides good development flexibility and requires a relatively short application development cycle. DSP techniques have been at the heart of progress 3rd, 2024.
