Mar 1st, 2024. Sensored single-phase BLDC motor driver using PIC16F1613. A BLDC motor is a good alternative to a three-phase BLDC motor. This type of motor is low cost because of its simple construction, which is easier to fabricate. Also, it only requires a single-position sensor and a few numbers of driver switches in order to control and energize the motor winding. Therefore, the trade-off is between cost and performance.
